Claims 1, 25, 27, 29, and 42 have been amended by the amendment filed December 29, 2004.

Claims 1-10, 12-52 are in condition for allowance. The prior art of record appear to teach and/or suggest a polycationic polymer comprises of random histidine residues mixed with lysine residues. See US Pat No. 6,312,727, figure 5 and/or column 28, last paragraph. However, the claims as amended do not intend to claim a random histidine copolymer, which may include other limitations as recited in the claims. In addition, Applicant's response, claim amendment, and especially the 1.132 Declaration of Dr. Mixson, obviate all outstanding rejections. However, the following objections must be corrected prior allowance of the as-filed application.

The specification is also objected because this application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825 because page 9, lines 2-3, or Figure 17 contains peptide sequences, wherein no SEQ ID NO: is associated with a corresponding disclosed sequence. Applicant must comply with the requirements of the sequence rules (37 CFR 1.821 - 1.825) in order to be fully responsive to this action.

The specification is objected because of typographical errors on page 27, line 2, Correction is required.
